

Representing

1. Represent the mixed numbers using the bar model.

$$1\frac{1}{3} \quad 1\frac{1}{5} \quad 1\frac{2}{3} \quad 2\frac{3}{5}$$

2. Convert the improper fraction by grouping items into groups of the denominator

$$\frac{3}{2} \quad \frac{8}{4} \quad \frac{7}{3} \quad \frac{12}{5} \quad \frac{9}{7} \quad \frac{33}{10}$$

Representing

1. Represent the mixed numbers using the bar model.

$$1\frac{1}{4} \quad 1\frac{1}{5} \quad 1\frac{2}{3} \quad 2\frac{3}{5}$$

2. Convert the improper fraction by grouping items into groups of the denominator

$$\frac{3}{2} \quad \frac{8}{4} \quad \frac{7}{3} \quad \frac{12}{5} \quad \frac{9}{7} \quad \frac{33}{10}$$

Representing

1. Represent the mixed numbers using the bar model.

$$1\frac{1}{5} \quad 1\frac{1}{5} \quad 1\frac{2}{3} \quad 2\frac{3}{5}$$

2. Convert the improper fraction by grouping items into groups of the denominator

$$\frac{3}{2} \quad \frac{8}{4} \quad \frac{7}{3} \quad \frac{12}{5} \quad \frac{9}{7} \quad \frac{33}{10}$$

Representing

1. Represent the mixed numbers using the bar model.

$$1\frac{1}{6} \quad 1\frac{1}{5} \quad 1\frac{2}{3} \quad 2\frac{3}{5}$$

2. Convert the improper fraction by grouping items into groups of the denominator

$$\frac{3}{2} \quad \frac{8}{4} \quad \frac{7}{3} \quad \frac{12}{5} \quad \frac{9}{7} \quad \frac{33}{10}$$

Representing

1. Represent the mixed numbers using the bar model.

$$1\frac{1}{7} \quad 1\frac{1}{5} \quad 1\frac{2}{3} \quad 2\frac{3}{5}$$

2. Convert the improper fraction by grouping items into groups of the denominator

$$\frac{3}{2} \quad \frac{8}{4} \quad \frac{7}{3} \quad \frac{12}{5} \quad \frac{9}{7} \quad \frac{33}{10}$$

Representing

1. Represent the mixed numbers using the bar model.

$$1\frac{1}{8} \quad 1\frac{1}{5} \quad 1\frac{2}{3} \quad 2\frac{3}{5}$$

2. Convert the improper fraction by grouping items into groups of the denominator

$$\frac{3}{2} \quad \frac{8}{4} \quad \frac{7}{3} \quad \frac{12}{5} \quad \frac{9}{7} \quad \frac{33}{10}$$

Representing

1. Represent the mixed numbers using the bar model.

$$1\frac{1}{9} \quad 1\frac{1}{5} \quad 1\frac{2}{3} \quad 2\frac{3}{5}$$

2. Convert the improper fraction by grouping items into groups of the denominator

$$\frac{3}{2} \quad \frac{8}{4} \quad \frac{7}{3} \quad \frac{12}{5} \quad \frac{9}{7} \quad \frac{33}{10}$$

Representing

1. Represent the mixed numbers using the bar model.

$$1\frac{1}{10} \quad 1\frac{1}{5} \quad 1\frac{2}{3} \quad 2\frac{3}{5}$$

2. Convert the improper fraction by grouping items into groups of the denominator

$$\frac{3}{2} \quad \frac{8}{4} \quad \frac{7}{3} \quad \frac{12}{5} \quad \frac{9}{7} \quad \frac{33}{10}$$
